**What happened?**  
Error in the ABAP application program.  
  
The current ABAP program "SAPLKKBL" had to be terminated because it found a statement that could not be executed.

**Error analysis**  
An attempt was made to access a field symbol that has not been assigned yet (data segment number "-1").  
  
That error occurs if  
- a typed field symbol is addressed before it has been set with ASSIGN,
